

Special Issue

Occurrence, Accumulation, and Impacts of Environmental Pollutants in Aquatic Systems

Message from the Guest Editors

This Special Issue aims to explore the occurrence, migration, transformation, accumulation, and effects of pollutants on wastewater treatment and aquatic systems. This Special Issue provides in-depth and systematic cross-disciplinary research on the release and traceability of environmental pollutants, toxicity assessment, novel detoxification technologies, environmental behaviour, and policy development. The research results can provide theoretical support and a scientific basis for the control and risk assessment of pollutants (nitrogen, phosphorus, heavy metals, toxic organic matter, emerging pollutants, etc.).

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa
Department Environmental Chemistry, IDAEA-CSIC, Jordi Girona 18,
08034 Barcelona, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
