

Special Issue

Developmental Exposure to Environmental Contaminants

Message from the Guest Editors

We are pleased to invite you to contribute to this Special Issue which aims to explore a variety of topics in line with the aims and scope of *Toxics*. Specifically, topics related to the developmental effects of environmental contaminants and/or their metabolites on the molecular, cellular, tissue, organ, organ system or organism, including mechanisms of toxicity, metabolism, risk assessment and management, as well as multiple stressor impacts in the context of aging or disease progression following developmental exposures. In this Special Issue, original research articles and reviews are welcome. Research areas may include, but is not limited to the following: developmental effects of environmental exposures using in vitro, ex vivo, or in vivo models, and fetal origins of adult disease models. This Special Issue may include developmental effects of emerging contaminants of concern, mixtures, metals, pesticides/herbicides, persistent organic pollutants, or particulate matter, to name a few. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
