Use of Antibodies/Antivenom Against Envenoming

Message from the Guest Editors

Antivenoms remain the mainstay treatment of systemic envenoming in humans following bites by a range of animals. However, there is still considerable debate about the effectiveness of some antivenoms, the correct dose and frequency of administration of antivenoms to maximise their effectiveness, as well as the ability of antivenoms to cross-neutralise the effects of venom from closely related, or even unrelated, species. There is also a lack of clarity regarding the ability of antivenoms to neutralise different classes of toxins and the timeframe for this neutralisation to occur. This Special Issue of *Toxins* aims to provide insight into these issues as well as provide the opportunity for exploration of emerging issues in the use and/or development of antivenoms. Prof. Dr. Geoff Isbister

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
