Special Issue

Advances in Emerging and Reemerging Infectious Diseases

Message from the Guest Editors

In order to better comprehend and respond to emerging and re-emerging diseases, the development of multidisciplinary and collaborative approaches, including an improved understanding of pathogenesis and epidemiology, advances in diagnostics and treatment, and progress in disease prevention and public health responses, is essential. For this Special Issue, "Advances in Emerging and Re-emerging Infectious Diseases", we invite articles from various disciplines concerned with emerging and re-emerging infectious diseases involving viruses, bacteria, fungi, and parasites. We welcome original articles, case reports, reviews (both narrative and systematic), and meta-analyses. The scope of the issue shall comprise the following:

- Original articles regarding advances in emerging and re-emerging infectious diseases (including pathogenesis, clinical characteristics, epidemiology, advances in diagnostics and treatment, and prevention).
- Case reports pertaining to advances in emerging and re-emerging infectious diseases.
- Reviews on advances in emerging and re-emerging infectious diseases (based on systematic and narrative reviews).
