

## Special Issue

# Emerging Diseases/Viruses Prevention: Control, Surveillance, and One Health

### Message from the Guest Editor

Zoonoses represent up to 60% of infectious diseases and 75% of new diseases in humans. They can cause considerable economic losses each year, as recently illustrated by the COVID-19 pandemic. Several factors, such as intensive agricultural and livestock practices, human population growth, and international travel, are known to contribute to the emergence of zoonotic diseases. This special issue will cover the topic of One Health and its application in the prevention and control of emerging diseases. The One Health concept recognizes that the health of humans, animals, vectors, and their ecosystems are closely interconnected. In this Special Issue, we invite colleagues to submit original research articles and scientific reviews to assemble a collection of papers highlighting advancements in our understanding of all aspects related to surveillance and control of zoonotic disease, including (but not limited to) 1) development of new diagnostic tools, 2) outbreak investigation and surveillance program of emerging pathogens (including One health approaches), and 3) understanding of the mechanisms of pathogen emergence.

---

### Guest Editor

Prof. Dr. Yannick Simonin

Institut de Génétique Moléculaire de Montpellier, University of Montpellier. Pathogenesis and Control of Chronic and Emerging Infections (PCCEI), 60 Rue de Navacelles, 34394 Montpellier, CEDEX 5, France

---

### Deadline for manuscript submissions

closed (24 December 2022)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

##### Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 4.8 days (median values for papers published in this journal in the first half of 2024).
