Emerging Trends of Infectious Diseases in Canada

Message from the Guest Editor

Emerging trends in infectious diseases in Canada are shaped by climate change, global travel, livestock and wildlife interactions, and rising antimicrobial resistance. Increased temperatures and altered ecosystems have expanded vector-borne diseases such as Lyme disease, anaplasmosis, and West Nile virus. Urbanization complicates interactions among humans, livestock, and insect vectors. The resurgence of vaccine-preventable diseases like measles and pertussis underscores the need for strong immunization programs amid vaccine hesitancy. The COVID-19 pandemic highlighted the necessity of robust public health infrastructure for managing novel pathogens, with genomic surveillance and advanced diagnostics improving outbreak responses. Additionally, the opioid crisis and healthcare disruptions have increased bloodborne infections like HIV, hepatitis C, and tuberculosis among vulnerable groups. Canada's multicultural society requires tailored public health strategies to address diverse needs. Ongoing research, active surveillance, and interdisciplinary collaboration are vital for mitigating the impact of these emerging infectious diseases.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the second half of 2024).
