

Special Issue

Neglected and Emerging Tropical Diseases in South and Southeast Asia and Northern Australia

Message from the Guest Editors

Dengue is a mosquito-borne viral disease found in tropical and sub-tropical climates worldwide. The disease significantly impacts global health. The World Health Organization (WHO) proposed a road map for the period of 2021–2030, with the global target for dengue control being to reduce preventable dengue deaths to zero and to reduce dengue incidence by 25%. In line with the global targets, this Special Issue aims to provide coherent and comprehensive insights on updates on dengue research to continue the battle against dengue and to prepare for future outbreaks. In this Special Issue, we encourage the submission of reviews or original research articles on the following scopes:

- Dengue pathogenesis–virus–host interactions;
- Dengue virology;
- Dengue diagnosis and biomarkers;
- Dengue vaccines and Immunology;
- Dengue antiviral research and development;
- Dengue epidemiology and climate change;
- Dengue vector control and surveillance;
- Severe dengue and clinical management.

Guest Editors

Prof. Dr. Patricia Graves

Assoc. Prof. Thewarach Laha

Prof. Dr. Peter A. Leggat

Dr. Khin Saw Aye

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 4.8 days (median values for papers published in this journal in the first half of 2024).
