

# Special Issue

## Solar Coronal Loop Dynamics

### Message from the Guest Editors

In the past few decades, owing to the large number of observations from novel designed instruments, such as the space telescopes SOHO, TRACE, Hinode, STEREO, SDO, PSP, and SoLo; many ground-based optic telescopes globally; and the ground-based radio telescopes NRH, NoRH, MUSER, and EVOSA, as well as JVLA, ALMA, LOFAR, MWA, etc., we have made great progress in the research of coronal loop dynamics with simulations and theoretical explanations. We invite colleagues to submit their recent papers on one or more of the following topics for this Special Issue: New interesting observations of coronal loops; Magnetic field diagnostics and extrapolation; Waves and oscillations in coronal loops; Interactions between coronal loops; Heating, cooling, and condensation; Particle acceleration & radio emission in coronal loops; The triggering and onset of MHD instabilities; The evolution of the whole lives of coronal loops.

### Guest Editors

Prof. Dr. Yihua Yan

Key Laboratory of Solar Activity, National Astronomical Observatories of Chinese Academy of Sciences, Datun Road 20A, Chaoyang District, Beijing, China

Prof. Dr. Baolin Tan

Division of Solar Physics, National Astronomical Observatories of Chinese Academy of Sciences, Beijing 100192, China

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

The multidisciplinary *Universe* journal is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the editorial board, I extend my welcome to this new journal and look forward to hearing from the interested contributors and learning about their valuable research.

---

### Editor-in-Chief

Prof. Dr. Lorenzo Iorio

Ministero dell'Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari, BA, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
