

Special Issue

Relativistic Heavy Ion Physics

Message from the Guest Editors

A recently discovered state of nuclear matter known as the quark–gluon plasma (QGP) exists at extremely high temperatures and densities formed in relativistic heavy-ion collisions (HIC). Under such extreme conditions, the composite hadronic states dissolve into a soup of their constituents, quarks, and gluons of quantum chromo dynamics (QCD), whose dynamical properties remain a subject of intense theoretical and experimental studies. This Special Issue aims at providing a comprehensive outlook regarding these important research topics covering the current state-of-the-art vision and ideas that hopefully could shed more light on the fundamental unsolved problems of QCD in extreme conditions. For detailed information, please visit [here](#).

About the Journal

Message from the Editor-in-Chief

The multidisciplinary *Universe* journal is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the editorial board, I extend my welcome to this new journal and look forward to hearing from the interested contributors and learning about their valuable research.

Editor-in-Chief

Prof. Dr. Lorenzo Iorio

Ministero dell'Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari, BA, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
