

## Special Issue

# Adaptive and Innate Response to Viral Disease

### Message from the Guest Editor

The goal of this Special Issue on “Adaptive and Innate Response to Viral Disease” is to highlight recent discoveries in understanding the protective or deleterious roles of adaptive and innate immune responses upon viral infection and viral immune evasion or suppression mechanisms. The present Special Issue invites submissions of original research articles and reviews. The research areas may include, but are not limited to, the following: adaptive immune response to viral infection, innate immune response to viral infection, the dynamic interaction of immune cells and viruses, host immunity-mediated immunopathology, and immune evasion or suppression. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2024).
