

## Special Issue

# Advances in COVID-19 Vaccines and Neutralizing Antibody

### Message from the Guest Editors

Antibody immune response is important for the clearance of the virus and critical for the generation of memory response to prevent reinfection. SARS-CoV-2 generates a virus-specific IgM, and IgG and neutralizing IgG response in the days following infection. However, the IgG response wanes over time and in some cases leads to only partial protection. There is a need for further research in this field to understand the measure/degree of long-term protection conferred by the vaccine, vaccine-driven pathology, and immune differences among patients. In this Special Issue, we invite articles investigating antibody response to coronavirus, including but not limited to the role of neutralizing antibodies in SARS-CoV-2 infection, mechanisms that lead to viral escape, immune parameters correlated with cytokine release syndrome, and T cell and B cell dynamics in coronavirus infection. Research in this field will aid in further understanding the pathogenesis of the disease and in the development of improved vaccine strategies.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2024).
