

## Special Issue

# State-of-the-Art Vaccine Research in AustralAsia

### Message from the Guest Editor

Asia and Australia are globally renowned for their research on vaccine development, which also includes extensive efforts toward the development of SARS-CoV-2 vaccines. Indeed, there is a large number of research teams devoting their work to vaccine development across Australasian countries. Moreover, many countries have their own medical research center/institute working on many aspects of vaccine development; these include the following, to mention a few: Eliza Hall Institute of Medical Research and Doherty Institute (Australia), Center for Vaccine and Adjuvant Research and Institute for Vaccine Research and Development (Japan), International Vaccine Institute (Korea), Beijing Institute of Biotechnology, Chinese PLA Center for Disease Control and Prevention, National Institute of Diagnostics and Vaccine Development in Infectious Diseases (China), and Malaysian Genome and Vaccine Institute (Malaysia). This Special Issue is devoted to vaccine development in Australia and Asia. The Special Issue is expected to promote vaccine work from Australasia worldwide. Research articles and reviews are welcome, as long as they provide a consolidated view of the state of the art in this area.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2024).
