

## Special Issue

# Immunization of Children and Women against Infectious Diseases

### Message from the Guest Editor

Vaccination is a highly effective method of preventing certain infectious diseases. Routine immunization programs protect most of the world's children and women from a number of infectious diseases that previously caused millions of deaths each year. Furthermore, infectious disease occurs within the context of family systems, so it is not simply the children and women. This Special Issue is open to any subject area related to children or women living with and affected by infectious disease. Special attention will be paid to the burden of COVID-19 on children and women and immunization in children and women against infectious disease. We invite research employing quantitative and qualitative methods as well as contributions featuring under-researched populations.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2024).
