

Special Issue

Vaccination, Public Health and Epidemiology

Message from the Guest Editor

This Special Issue focuses on the current state of vaccinology as applied to the epidemiology control of infectious diseases, as well as the philosophies, findings, and dynamics of vaccine-preventable diseases and current immunization strategies in the context of public health interventions. In addition to the currently available vaccines, this Special Issue will review new vaccines for emerging and re-emerging diseases, as well as vaccines for neglected tropical diseases. Furthermore, it will address the process of vaccine development, vaccine platforms, and vaccine trials. Papers addressing public health strategies applied to vaccine-preventable disease control are also invited.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2024).
