

## Special Issue

# The Need for an HIV Vaccine in the Era of Highly Effective PrEP

### Message from the Guest Editors

There is still a need for an HIV vaccine, even though there are effective HIV prevention options like pre-exposure prophylaxis (PrEP). This Special Issue aims to thoroughly examine the landscape of HIV prevention with an emphasis on the critical role of an HIV vaccine in bringing an end to the HIV epidemic. It will encompass the extensive impact of HIV vaccine research infrastructure, ongoing initiatives in HIV vaccine research, and the strategic direction for future research in this field.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2024).
