Immunization Strategies and Vaccine Uptake after the SARS-CoV-2 Pandemic

Message from the Guest Editors

The SARS-CoV-2 Pandemic has severely impacted the daily practice of medical professionals all around the world, as a large share of Healthcare Workers has seen their daily activities either disrupted or shifted on settings directly related in the global efforts to contain the effect of the pandemic. Vaccination services have been severely impacted, not only during the early stages of the pandemic, but also in its aftermath, as the global campaign for the delivery of SARS-CoV-2 vaccines has drained human and material resources from more “conventional” vaccine interventions. In the meantime, global attitudes towards vaccines and immunizations have been impacted by an unprecedented infodemic on infectious diseases and public health interventions. Our aim is to share a broader point of view, specifically including all the professionals (e.g., Gynecologist and Obstetrics, Occupational Physicians, etc.) who are actively involved in vaccination campaigns in specific population groups.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2024).
