

Special Issue

COVID-19 Vaccination: Considerations for Public Health and Policy

Message from the Guest Editors

Development and large-scale implementation of COVID-19 vaccination represent a promising tool for reaching herd immunity and ending this global crisis. In this Special Issue, original research articles and different types of evidence-summaries are welcome. Research areas may include (but not limited to) the following:

- COVID-19 vaccine acceptance, hesitancy, and refusal, including assessments of the evolving epidemiology and understating of individual, group-level and context-specific determinants of these phenomena.
- Monitoring and continued development of COVID-19 vaccines, including efficacy and effectiveness of vaccines in the context of emerging variants, safety, booster doses, mixing and matching vaccines.
- Public health and policy issues, including vaccine deployment, ensuring equitable access, communication strategies for encouraging vaccine uptake and introduction of vaccine passports.

We look forward to receiving your contributions. Drs. Stojanovic and Lavoie

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the second half of 2024).
