Special Issue

Horse Reproduction and Fertility

Message from the Guest Editors

Equine reproduction is a rapidly evolving field with novel discoveries made at a fast pace. Both mare and stallion fertility has been extended by refining traditional practice methods as well as advances in assisted reproductive technologies (ART). This special issue welcomes submissions in the field of horse reproduction and fertility with an emphasis on mare and stallion reproductive endocrinology and physiology, genetics, equine pregnancy outcomes, and in vitro production of live foals.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).
