

Special Issue

Nonlinear Vibration of Mechanical Systems

Message from the Guest Editors

We are delighted to invite you to contribute to a Special Issue entitled "Nonlinear Vibration of Mechanical Systems" in *Vibration*. Research on the modelling of mechanical systems has been crucial in various engineering fields. Despite extensive studies in this area, emerging applications and new materials present new challenges. This Special Issue aims to unite cutting-edge research and innovative perspectives on the complex dynamics and behaviours exhibited by mechanical systems under nonlinear vibrations. These systems often showcase intricate and nonlinear dynamics, leading to a rich spectrum of vibrational phenomena. The Special Issue covers a wide range of topics, including, but not limited to, nonlinear modal interactions, chaos and bifurcation in mechanical systems, the nonlinear dynamics of coupled structures, nonlinearities in control systems, experimental investigations of nonlinear vibrations, and the application of nonlinear dynamics in engineering design.

Guest Editors

Prof. Dr. Francesco Pellicano

Prof. Dr. Yuri Mikhlin

Prof. Dr. Konstantin V. Avramov

Dr. Antonio Zippo

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Aleksandar Pavic

College of Engineering, Mathematics and Physical Sciences, Kay
Building, University of Exeter, Exeter EX4 4QF, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), and other
databases.

Journal Rank:

CiteScore - Q2 (Engineering (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 22 days after
submission; acceptance to publication is undertaken in 3.7
days (median values for papers published in this journal in
the first half of 2024).
