

Special Issue

Chikungunya Virus and Emerging Alphaviruses—Volume II

Message from the Guest Editors

We recently unveiled a *Viruses* Special Issue entitled "Chikungunya Virus and Emerging Alphaviruses," which has garnered remarkable interest and received numerous submissions. Given the outstanding success of the previous Special Issue, we are excited to extend an invitation to our colleagues to participate in a second volume of this Special Issue. For this Special Issue, we enthusiastically invite the submission of original research articles, comprehensive review articles, and concise short communications. We encourage contributions that advance our comprehension of Alphaviruses. The following topics are of particular interest for this Special Issue:- Alphaviruses epidemiology and virus surveillance (emergence and virus evolution);- Advances in diagnostics, treatment and vaccines;- Basic virology molecular aspects;- Alphaviruses pathogenesis (including, but not limited to, host response and host factors affecting infection outcome, animal models of infection, host innate and adaptive immunity, and virus immune response evasion);- Measures for control and prevention

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

Director, HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
