

Special Issue

Host Diversity and Responses to Bat-Associated Viruses

Message from the Guest Editors

Dear colleagues, This Special Issue focuses on host–virus relationships—specifically, issues of host-breadth or plasticity, pathogenicity, and transmissibility of bat-associated viruses. Examples could include co-evolution of virus and host receptors, host innate and adaptive immune responses to viral infection, viral incidence or prevalence studies, comparative experimental studies using animal models or cell lines, and potential for human–animal transmission, in either direction. This Special Issue will be limited to original research, literature reviews with novel insights, and hypothesis-based manuscripts.

Guest Editors

Dr. Jonathan Epstein

Departments of Pathology, Urology and Oncology, The Johns Hopkins Medical Institutions, Baltimore, MD, USA
EcoHealth Alliance, 520 Eighth Avenue, Suite 1200, New York, NY 10018-6507, USA

Dr. Tony Schountz

Arthropod-borne and Infectious Diseases Laboratory, Department of Microbiology, Immunology and Pathology, Colorado State University, Collins, CO, USA

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

Director, HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
