Viruses of Microbes

Message from the Guest Editors

The International Society for Viruses of Microbes (ISVM) represents large scientific community studying viruses of archaea, bacteria, protists and fungi. One of its activities is a biannual multidisciplinary meeting, which covers the full range of current developments in the field of viruses of microbes, from structural biology to ecology and from fundamental to applied research. In the Viruses of Microbes Special Issues published in Viruses, we hope to collect series of research articles which will reflect the full diversity of this field with current and future trends of fundamental and applied research.

Guest Editors

Dr. Tessa E.F. Quax

Biology of Archaea and Viruses, Groningen Biomolecular Sciences and Biotechnology Institute, University of Groningen, Groningen, The Netherlands

Dr. Matthias G. Fischer

Department of Biomolecular Mechanisms, Max Planck Institute for Medical Research, Heidelberg, Germany

Dr. Laurent Debarbieux

Department of Microbiology, Institut Pasteur, Paris, France

About the Journal

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Editor-in-Chief

Dr. Eric O. Freed

Director, HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
