The New Nexus: The Interconnection of Climate Change, Source Water Protection, and Public Health

Message from the Guest Editors

We invite the submission of research articles related to the interconnections between climate change, source water, and public health including, but not limited to, the following:

- Climate-induced changes to the occurrence of DBPs and DBP precursors;
- mobilization of contaminants (including emerging contaminants such as PFAS) due to changing climate conditions;
- resilience of drinking water systems to severe climate events;
- watershed-scale models of water quality under climate conditions;
- field studies of water quality before, during, and/or after climate events;
- community-based monitoring of source water quality with a connection to climate change and public health;
- studies connecting water source protection and climate change to enhance public health.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
