

Special Issue

Water Quality Monitoring and Public Health

Message from the Guest Editor

As the for this Special Issue, “Water Quality Monitoring and Public Health”, I have the honor of inviting you to publish a feature paper in *Water*, as a contribution to achieving the UN Sustainable Development Goals, especially regarding Goal 6: Clean Water and Sanitation. Within this framework, for this Special Issue, I would like to invite original research contributions, review articles, as well as short communications that emphasize and give an overview of the water qualities of the surface waters, as well as groundwaters. I would also like to invite scientists and professionals who are dealing with drinking and bottled water monitoring and monitoring of other water types (swimming pool water, sea water, irrigation water, process water) that directly or indirectly significantly can affect public health to present the results of their latest research. Please feel free to reach out to me or alexandra.wang@mdpi.com should you have any questions.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
