

## Special Issue

# Selected Papers from HydroMediT 2018

### Message from the Guest Editors

To date, “HydroMediT” is being established as one of the major international congresses on novel scientific and technological trends and aspects on aquatic living resources in our region, covering the Mediterranean and its adjacent seas. The meeting's topic, “Blue Biotechnology in Aquatic Living Resources”, highlights the importance of novel methods in the secure and sustainable supply of good quality food from the sea. Policy makers, industry players, scientists, and conservationists shall work together as they are all determined to deal with the challenges this growth presents, and to ensure that biomachines in real time make a positive contribution to the sustainability of aquatic living resources in a changing world. General fields of interest will be the following:

- Aquaculture
- Fisheries
- Processing of aquatic products
- Economics and marketing of fisheries products
- Inland aquatic ecology and resources
- Oceanography
- Marine diversity and conservation
- Environmental management

HydroMediT 2018 Authors are entitled to 50% discount for publications at *Water!*

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
