

## Special Issue

# River Basin Management and River Evolution Research

### Message from the Guest Editors

As society has developed, human actions in the natural environment - at first isolated and insignificant - have gradually increased. As a result, anthropogenic intervention on relatively large areas has become a decisive factor in degradation by erosion and landslide processes, and has affected the water conditions in terms of quality and quantity [...] For further reading, please follow the link to the SpecialIssue Website at:[https://www.mdpi.com/journal/water/special\\_issues/River\\_Basin](https://www.mdpi.com/journal/water/special_issues/River_Basin)

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
