

Special Issue

Biology and Ecology of Threatened Freshwater Fish

Message from the Guest Editor

Researchers working on threatened freshwater fish are invited to contribute to this [Special Issue](#). We seek contributions that address advances in areas such as taxonomy, phylogenetics, biogeography, fisheries, biomonitoring, climatic change, and different aspects of their ecology and biology as changes in growth, distribution, and abundance, responses to water pollution, critical habitat degradation, eutrophication, chemical toxicity, thermal changes, food availability, etc.

Guest Editor

Prof. Dr. Fernando Cobo

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
