

Special Issue

Emerging Materials, Concepts and Processes for Wastewater Treatment Sector for Sustainable Future

Message from the Guest Editor

The aim of the current Special Issue is to explore materials, methods and processes in all aspects of wastewater treatment processes, covering primary, secondary and/or tertiary wastewater treatment processes. Topics of interest for the current Special Issue include but are not limited to:

- Biologically-Enhanced Primary Treatment of Wastewater;
- Adsorption of Conventional and Emerging Water Contaminants from Wastewater;
- Advanced Oxidation Processes;
- Functional Materials for Wastewater Treatment Processes;
- Concept of 3Rs—Reduce, Recycle and Reuse—in Water Treatment Sector;
- New Strategies for Integrated Wastewater Treatment Industry.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
